

## Poultry Formula

A complementary liquid feedstuff containing a blend of essential vitamins, amino acids, trace elements, electrolytes, nucleotides and natural prebiotic fibres for poultry and game birds.

**Comprehensive vitamin specification**

**Amino acids**

**Nucleotides**

**Soluble prebiotic fibre source**

**Trace element electrolyte salts**

---

**Supplement growth  
and development**

---

**Assists in  
delivering nutrient  
requirements for  
optimum production**

---

**Gut health  
support**

---

**Help to maintain  
bird's balance**

---

### Objectives:

- Help to provide vital vitamins and nutrients helping support growth.
- Aid normal immune function during challenge.
- Support optimum performance.

### Product Indications:

- Reduced feed intake.
- Vaccination.
- Feed change.

### Technical Interest:

**Poor vitamin availability:** Feed is expertly formulated to supply nutrients for optimum growth under normal conditions. Unpredictable variations in feed intake or growth may increase need for additional vitamins.

**Support growth and normal immune function:** Intensive production generates metabolic and physiological stress, increasing the production of free radicals. To help ensure valuable nutrients are utilised for growth, free radicals can be minimised by the action of antioxidants.

**Gut health:** The gut must develop quickly to effectively process nutrients for long term benefits. A healthy gut supports the development of favourable flora for optimum digestion and health.

For Poultry

A complementary liquid feedstuff containing a blend of essential vitamins, amino acids, trace elements, electrolytes, nucleotides and natural prebiotic fibres for poultry and game birds.

#### Benefits:

- Chicks: As a chick start product to load the birds with nutrients to maintain growth.
- Growing birds: Helps during periods of stress, poor growth or following vaccination.
- Breeding birds: Contributes to support fertility and eggshell quality.
- Laying birds: Helps support new flocks or to assist with nutrient supply during vital POL or peak lay periods.

## Poultry Formula

When to apply:

✓  
**Chicks**  
Day old  
to 5 days  
of age

✓  
**2-3 days**  
during periods  
of challenge;  
vaccination, poor  
growth or poor  
feed intake

✓  
**2-3 days**  
before and after  
direct change  
(Poults and Pullets)

✓  
**2-3 days**  
before and after  
vaccination/drug  
treatment  
(Poults and Pullets)

✓  
**First 5 days**  
in new flocks  
routinely at onset  
of lay and during  
peak lay  
(Layers)

Poultry Formula

#### Application:

Add 2,000ml of **Poultry Formula** liquid to 1,000 litres of clean drinking water. Ensure Dosatron™ stock solution is calibrated for appropriate uptake. No manual stirring is required. Product can be used as standard management practice or during individual cycle cases of digestive stress according to the discretion of the farm manager. To maintain drinking lines and water quality, any water application should be followed with a suitable 1:50,000 dilution of sanitiser.

#### Storage:

Store in cool and dry place away from direct light. Keep away from children.

**Shelf Life:** 24 months from date of manufacturing.

**Pack Size:** 1L Bottle.
